Solar powering a green future™

*Why SUNTECH
is the smartest
choice in solar*

NHB 10/09

Save money.

Save energy.

Save the planet.

Solar energy is a sustainable, renewable and affordable way to power your home and protect the environment. Not to mention protecting your wallet against ever-rising utility rates.

If you want to save money, you know solar is the answer.

The only question is:

How do you choose the right solar panels?

All solar panels are not alike. There are significant differences in the products, the warranties and the companies that manufacture them.

Many solar companies promise performance and reliability, but not everyone delivers.

More and more homeowners are discovering it's smart to go solar – and smart to go with Suntech.

Suntech is different. We offer reliable power and lasting performance.

Our panels are specially engineered to help harness more of the sun's power today – and tomorrow.

The more you learn about Suntech, the more you'll know why we're the smartest choice for your home.

For a lot of very good reasons...

Ah, the many joys of solar.

Reason #1:

Because declaring your energy independence is the best feeling under the sun.

Reliable power, lasting performance. That's the Suntech difference.

Solar panel output can vary. But Suntech solar panels are proven to reliably deliver consistent power over their entire lifetime. Every Suntech panel's power output is within +/-3% of rating – one of the narrowest tolerances in the industry. Which means you can count on them to perform consistently in all types of conditions. And to deliver reliable performance, year after year.

How solar works:

Suntech panels deliver clean, reliable energy and help lower your electric bills year-round.

Reason #2 :

Because your home can be a powerhouse.

You can count on Suntech panels to deliver clean, affordable, reliable energy every single day. And to deliver on their promise for years to come. That's why we're the gold standard of the industry. And, the smartest choice for your home.

Only Suntech solar panels offer these powerful advantages:

• **Optimal, consistent performance:**

Special, patented pyramid surface texturing draws more light into the cell from all angles

• **Increased conversion efficiency:**

Silicon nitride anti-reflection coating absorbs more sunlight

• **More usable energy:**

Patented edge isolation process maintains efficiency on cloudy days

• **Consistent performance after exposure to intense sunlight:**

Solar cells can degrade after exposure to sunlight – which is why other brands of modules degrade right after installation 3-5%. But Suntech's proprietary Gallium F22 process reduces output degradation to less than 1%-- so there's virtually no loss of performance (translation: you get what you are paying for)

• **Decades of dependability:**

Sturdy, high-quality aluminum construction is tested to the highest standards to withstand extreme conditions

• **Easy maintenance:**

Special, dust-resistant glass coating helps keep panels clean. Less maintenance means more power.

Reason #3:

Because you can set a shining example. Every day.

Suntech panels stand the test of time. Because we put our products to the test.

At Suntech, we're practically obsessed with quality control. Our products undergo some of the most rigorous testing in the industry. Our team of 700 quality control professionals oversee a disciplined, 53-step quality control and inspection process to ensure Suntech products meet the most stringent international standards.

Suntech panels are certified by independent labs such as UL, CE, TUV and IEC. So you can be confident they meet or exceed the strictest requirements for safe and reliable performance, year after year.

Suntech will be around tomorrow. Which makes us the smartest choice today.

You can't afford to risk buying solar panels from just anyone.

When you invest in Suntech solar panels, you can feel secure knowing Suntech is a financially strong company that will be around for decades to come. We have \$2 billion in sales worldwide and are listed on the New York Stock Exchange. Plus, major financial institutions have rated Suntech a top tier solar company because of our proven reliability and financial strength. Which is good to know. Because you can't put a price on peace of mind.

Reason #4:

Because with solar, the future looks bright.

Have we mentioned **Our absolutely amazing, 25-year transferable warranty?**

It's nice to know all Suntech products are backed by the best warranty in the business.

At Suntech, we don't just promise you'll be satisfied with our products - we back it up. We offer an industry-leading, 25-year warranty* that is unmatched by any other manufacturer. What's more, we have the only transferable warranty. Which means that if you sell your home, the new owner continues to benefit from the coverage. No wonder our warranty outshines any other in the business.

25 year
transferable warranty

- *Suntech guarantees at least 90% of original output after 12 years – more than any other solar manufacturer*
- *Our warranty claims are among the lowest in the industry*

*See actual warranty for all terms and conditions.

Reason #5:

Because it's not just a trend. It's the future.

When you choose Suntech, you'll be in good company.

Very good company. Suntech panels have demonstrated their lasting value in major solar installations around the globe - from the Weinbourg Solar Farm Project in Alsace, France to the Kanazawa Bus Terminal in Japan and San Francisco's International Airport. We're also the choice of thousands of businesses and homeowners around the world – and possibly even around your block.

Thanks to its Suntech solar power system, San Francisco International Airport is now the "greenest" airport in the U.S.

Reason #6.

Because choosing solar reflects well on you.

Suntech has the panels that are exactly right for your home.

We know appearances matter. Suntech solar panels don't just perform better – they look better. We offer aesthetically-pleasing solutions, including our attractive, Black Label™ monocrystalline solar panels that feature a totally black panel and black frame. Your Suntech Authorized Dealer can optimally design a system that performs beautifully and meets your home's unique requirements.

Performance and selection. That's the beauty of Suntech.

And the winner is...Suntech.

We're not the only ones who think Suntech technology is superior. Frost & Sullivan, the prestigious international research firm renowned for its independent analyses of Best Practices, recently selected Suntech as the 2008 Solar Development Company Of the Year.

Reason #7.

Because it feels good to lead the way.

Innovation and proven reliability have made Suntech a global leader in solar. And the most trusted choice for your home.

Suntech is a pure solar company – it's all we do. In fact, we are the largest manufacturer of crystalline solar panels in the world.

Suntech is focused on bringing you tomorrow's technology today. There's a reason why we make the best solar panels in the world: we have some of the best minds in the business. Our leading edge R&D team of 350 global experts, along with partnerships with major solar research institutions, ensures the finest technology and performance. To give you the most consistently reliable solar panels under the sun.

Suntech holds the world record for PV cell efficiency. In independent tests, we consistently outperformed the competition.

Reason #8.

Because there's never
been a better time to
go solar.

Or to save money.

Save at least 30%
on your solar system now
with the U.S. Investment
Tax Credit.

Right now, installing Suntech
panels is smarter than ever.
Because you can take
advantage of special state
and federal tax credits that
can significantly reduce the
installation cost of your
system.

Talk to your Authorized Suntech Dealer
to learn more about the incentives that
are available in your area.

Reason #9.

**Because you want to
make a difference.
For the whole planet.**

**Suntech. Committed
to a greener future.
For everyone.**

At Suntech, we're passionate about solar energy. Our company was founded by a renowned solar scientist who is a pioneer in the practical application of solar technology. He and his international team of solar experts have been at the forefront of solar innovation for over a decade. Their commitment to the environment, as well as their dedication to state-of-the-art research, continues to drive Suntech.

Our vision is to build a green 21st century where everyone has access to clean, sustainable and reliable solar energy. We're passionate about providing you with the highest quality solar energy solutions available today. So that together, we can build a greener, more environmentally friendly tomorrow.
